

Scratch

[Scratch](#) is both a **programming language** with a simple interface that allows young people to create digital stories, games and animations using block programming, and it is also the largest **programming community** for boys and girls in the world. Scratch is designed, developed and moderated by the [Scratch Foundation](#), a non-profit organization, which offers it openly and free in more than 70 languages.

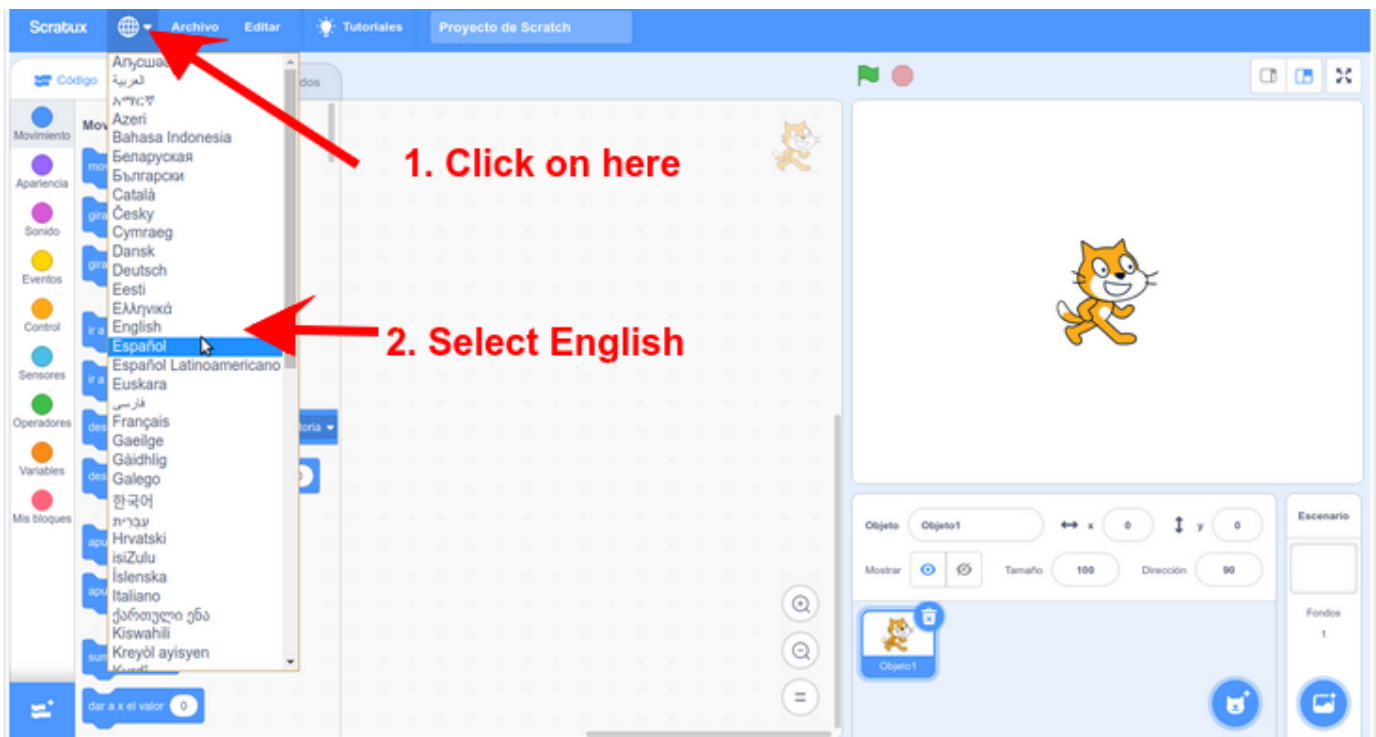

Scratch has been developed specifically for **young people between 8 and 16 years old**, although people of any age can participate in the project.

An online version of the tool is available on its website, accessible without the need for any type of registration.

We will use the offline tool called **SCRATUX** . It will allow to save and load our projects without any type of registration.

To change the language to English look at the picture:

Scratch is multi-platform free software, thus guaranteeing its universal accessibility.
